1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest a first current mirror circuit combining an analog power source and a digital power source to receive a small amplitude signal and a constant voltage input signal, a first node provided in the first current mirror circuit, a second node provided in a second current mirror circuit, an inverter circuit for receiving a signal output on the basis of voltage levels of the first node and the second node and for outputting a CMOS level signal as called for in claim 1. Therefore, claims 1-7 are presently allowed.
